

FEATURES

- **Tiered administration** lets you delegate tasks and authority.
- **Powerful, customisable reporting** gives you actionable information about your systems, and allows you to automatically run and distribute reports.
- **Easy implementation** gets you up and running quickly, while ease-of-use ensures that the solution delivers ongoing results without an additional burden on network staff.
- **More than fourteen proven lines of defence for blocking spam.**
- **Compliant email** archiving with controlled end-user access.
- **Comprehensive and accurate, education-specific URL filtering database** with more than one billion entries.
- **Advanced proxy detection** and blocking for better Acceptable Use enforcement.
- **Ability to accommodate even the heaviest traffic loads**, up to 1 GB of Internet bandwidth, without hindering performance.
- **Comprehensive virus database** with automatic updates.
- **Guide Mobile Filter** provides cross-platform remote web filtering and reporting on off-network activity.
- **Power Management** reduces electricity costs and carbon footprint for PCs.
- **The Educational Video Library** allows teachers to share approved YouTube videos with students.
- **NEW! My Big Campus** offers safe access to Web 2.0 tools, including a Resource Library to post, view, and share online resources as well as a Collaboration site.

Filter, secure, manage, and monitor with a single solution

Total Traffic Control is the complete solution for managing your school network's usage, health, and security. With this comprehensive solution you can monitor user activity, ensure Acceptable Use Policies are being followed (on email, the Web, or the desktop - both on the network and off), reduce dangerous and costly security threats, ensure school resources are utilised safely and effectively, and easily view and share critical information with custom reports.

Total Traffic Control gives schools best-of-breed network management and security with a single, comprehensive solution that includes **Web Access Manager, Email Manager, Network Traffic Manager, Power Manager** and **Security Manager**.

BENEFITS

Helps you set and enforce Acceptable Use Policies. Total Traffic Control makes it easy to create rules for use of network computers, mail servers, and web browsing. It also provides comprehensive reporting to alert you to potential breaches to those policies, and helps you correct or amend rules.

Keeps your network running smoothly. Total Traffic Control allows you to ensure the availability of critical services by giving you an easy-to-understand overview of network usage—and by providing you with the tools to manage traffic issues and bandwidth allocation.

Reduces exposure to inappropriate content. With spam blocking, Internet content filtering, and virus protection, you can ensure that your users, and your network, aren't exposed to harmful content.

Balances learning and security. Our solutions promote a balance between learning and security by offering safe, easily-managed ways to access Web 2.0 tools and resources, share online resources, and engage in participatory learning.

Blocks security breaches. A comprehensive database of viruses and malware detects known threats, while customisable program permissions allow you to stop even unknown threats—before they harm your network.

Allows you to ensure e-safety compliance.

Total Traffic Control blocks offensive or harmful web content, and archives all email, helping you effortlessly meet Ofsted e-safety compliance.

Offers flexibility and customisability.

Because every school is different, we give administrators the ability to adjust policies and databases on a granular level that ensures over-blocking and rigid restrictions don't hinder your users' ability to do their jobs effectively.

Comprehensive, Customisable Reporting

Total Traffic Control gives you access to comprehensive information about who, when, where, and how your network is being utilised, so you can adjust Acceptable Use Policies, change allowed usages, review problems and troubleshoot issues, and plan for ongoing needs. You can see high-level overviews, and then drill down for detailed information, with reports like:

- Busiest Protocols
- Top Network Users
- Blocked Content
- Search Engine Queries
- Mail Traffic Chart
- Traffic by Category
- Computers: Hardware
- Computers: System Information
- Computers: Software Inventory
- Instant Messaging

Network Solutions for Safe Online Learning

Software solutions

Manage your education network with our all-in-one solution or its components:

Filter, secure, manage, and monitor with a single solution.

Ensure safe web browsing with customisable filtering and features for safe Web 2.0 access.

Archive and report on communications, while blocking spam.

Block viruses, spyware, and malware with desktop and gateway security.

Control traffic with bandwidth management.

Manage energy use with automated power management.

High-capacity network solutions

High-performance, scalable appliance-based education network solutions:

Ensure safe web browsing on your high-capacity network with comprehensive, customisable filtering and features for safe Web 2.0 access.

Efficiently block spam on your high-capacity network, while archiving and reporting on communications.

Extend your high-capacity network solution with the addition of our other software products.

Get a comprehensive, cost-saving solution for your high-capacity network by combining the two Rocket appliances with Security Manager, Network Traffic Manager, and Power Manager.

About Lightspeed Systems

Lightspeed Systems Inc., founded in 2000, develops comprehensive network security and management solutions for the education market. We are committed to helping schools operate their networks effectively and efficiently, so educators can provide safe online teaching and learning environments.

Exceptional Service and Support

Our unparalleled service and support mean our solutions will continue to deliver, long after their easy implementation. With any Lightspeed Systems solution, you can depend on:

- Live-person phone technical support.
- Comprehensive online knowledge bases.
- The Lightspeed Wiki, rife with user collaboration and product expertise.

Professional Development & Training

Professional Services: We provide customised, collaborative professional development services to address your specific needs.

Training: To help you fully leverage your investment in Lightspeed Systems solutions, we offer an array of training options.

- Online introductory training and user demonstration videos.
- Administrator certification.
- Onsite training throughout the UK.
